Overview

CHCCOM005 - Communicate and work in health or community services (Release 2)

This unit describes the skills and knowledge required to communicate effectively with clients, colleagues, management and other industry providers.

This unit applies to a range of health and community service contexts where workers may communicate face-to-face, in writing or using digital media and work with limited responsibility under direct or indirect supervision.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

A complete copy of the above unit of competency can be downloaded from the TGA website:

Learner Instructions

This Learning Activity Booklet contains formative activities that learners will complete in the classroom or a similar environment.

These formative activities include knowledge questions to test your underpinning generic knowledge and practical activities to test your skills relevant to the unit/s of competency.

These formative assessments are used by your trainer to complement both the learning and training processes, and to evaluate how you are progressing throughout these processes.

You may reference your Learner Guide and other learning materials to complete the activities included in this workbook.

IMPORTANT:

The completion of the formative assessments and learning activities included in this workbook DOES NOT lead to a Qualification or a Statement of Attainment (SOA).

Work Health and Safety

Both the trainers and learners have a duty of care in ensuring that the learning environment is free from hazards that may pose risks to their health and safety.

According to WHS legislation, trainers and learners must take reasonable care while undertaking the activities included in this workbook in the learning environment.

Reasonable Adjustment

‘Reasonable adjustment’ in VET is the term applied to modifying the learning environment or making changes to the training delivered to assist a learner with a disability. A reasonable adjustment can be as simple as changing classrooms to be closer to amenities or installing a particular type of software on a computer for a person with vision impairment.

Why make a reasonable adjustment?

We make reasonable adjustments in VET to make sure that learners with disabilities have:

- The same learning opportunities as learners without disabilities, and
- The same opportunity to perform and complete assessments as those without disabilities.

Reasonable adjustment applied to participation in teaching, learning, and assessment activities can include:

- Customising resources and assessment activities within the training package or accredited course
- Modifying the presentation medium
- Learner support
- Use of assistive/adaptive technologies
- Making information accessible both before enrolment and during the course
- Monitoring the adjustments to ensure learner needs continue to be met

Assistive/Adaptive Technologies

Assistive/adaptive technology means ‘software or hardware that has been specifically designed to assist people with disabilities in carrying out daily activities’ (World Wide Web Consortium - W3C). It includes screen readers, magnifiers, voice recognition software, alternative keyboards, devices for grasping, visual alert systems, and digital note-takers.

(Adapted Reasonable Adjustment in teaching, learning and assessment for learners with a disability - November 2010 - Prepared by - Queensland VET Development Centre)

IMPORTANT:

Reasonable adjustment made for collecting learner assessment evidence must not impact the standard expected by the workplace, as expressed by the relevant unit/s of competency. For example, if the assessment were gathering evidence of the learner’s competency in writing, allowing the learner to complete the assessment verbally would not be a valid assessment method. The method of assessment used by any reasonable adjustment must still meet the competency requirements.
